provision, if any. This gives the net asset value of the fund. Dividing by the number of units existing at the valuation date (before any units are allocated/redeemed), gives the unit price of the fund under consideration. We round the resulting price to the nearest Re. 0.0001. This price will be published on our website and leading national newspapers. Units shall only be allocated on the day the proposal is accepted and results into a policy by adjustment of application money towards premium.
