F1 is the discounting factor calculated using prevailing interest rates described in Part D Clause 4 below.

- (6) If a reduced paid-up policy is subsequently surrendered, the surrender benefit shall be computed as below:

4. **Discount rate:**

The discount rate shall be computed with reference to the prevailing interest rates. The prevailing interest rates will be derived from yields of G-Sec securities of 40 years (Where 40 year G-sec bond yields are not available, the 30 year G-sec bond yields will be taken into consideration for SSV factors computation). Any change in the interest rate used will be in accordance with the formula below:

Annualized Yield on reference government bond + k rounded up to the nearest 25 basis points

Where k=150 basis points

The discount rates will be reviewed semi-annually and shall be revised using the above mentioned formula and the change in the discount rates shall be effective from 25th February and 25th August each year.

- The current interest rate on loan is 9.75% p.a. The interest rate on loan shall be calculated as the Average Annualised 10-year benchmark G-Sec Yield (over last 6 months & rounded up to the nearest 50 bps) + 2%. The interest rate shall be

reviewed half-yearly and any change in the interest rate shall be effective from 25th February and 25th August each year.

- In case upon review the interest rate is revised, the same shall apply until next revision. The source of 10-year benchmark G-sec yield shall be RBI Negotiated Dealing System-Order Matching segment (NDS-OM).
