Plan Options

You can choose from following 3 plan options -

- 1. Life & CI Rebalance** - A smart cover which aims to achieve a balance between Death and Critical Illness benefit as you go along in your life. Critical Illness cover increases at each policy anniversary with corresponding reduction in Life Cover. In addition, all future premiums are waived off on detection of any of the covered Critical Illnesses and the life cover continues.
- 2. Life Protect** - Under this plan option, a lump sum is provided on death of the life assured.
- 3. Income Plus** - Under this plan option, the Life Assured is covered for the entire policy term and also receives a lump sum payout on maturity along with regular income starting from age 60.

You may choose one of the above plan options at inception of the policy. Plan option once selected cannot be changed during the Policy Term. Benefits under each option are detailed below.

Benefits payable under various plan options:

1. Life & CI Rebalance

Under this plan option, Basic Sum Assured chosen by you will be split between Life Cover SA and Critical Illness SA (CI SA). At the beginning of the cover, Life Cover SA is set at 80% of Basic Sum Assured and CI SA is set at 20% of Basic Sum Assured. For an in-force policy, at every policy anniversary, starting from the first policy anniversary, CI SA will increase every year and Life Cover SA will decrease by the same amount. This amount will be calculated as follows:

30% x Basic Sum assured / Policy Term

Basic Sum Assured (Life Cover SA + CI SA) will remain the same throughout the policy term.

Example: for Basic Sum Assured of 50 lakhs and policy term of 10 years, benefit structure will vary over the term as follows:

Policy Year	Life Cover SA	CI SA	Policy Year	Life Cover SA	CI SA
1	40.0 lakh	10.0 lakh	6	32.5 lakh	17.5 lakh
2	38.5 lakh	11.5 lakh	7	31.0 lakh	19.0 lakh
3	37.0 lakh	13.0 lakh	8	29.5 lakh	20.5 lakh
4	35.5 lakh	14.5 lakh	9	28.0 lakh	22.0 lakh
5	34.0 lakh	16.0 lakh	10	26.5 lakh	23.5 lakh

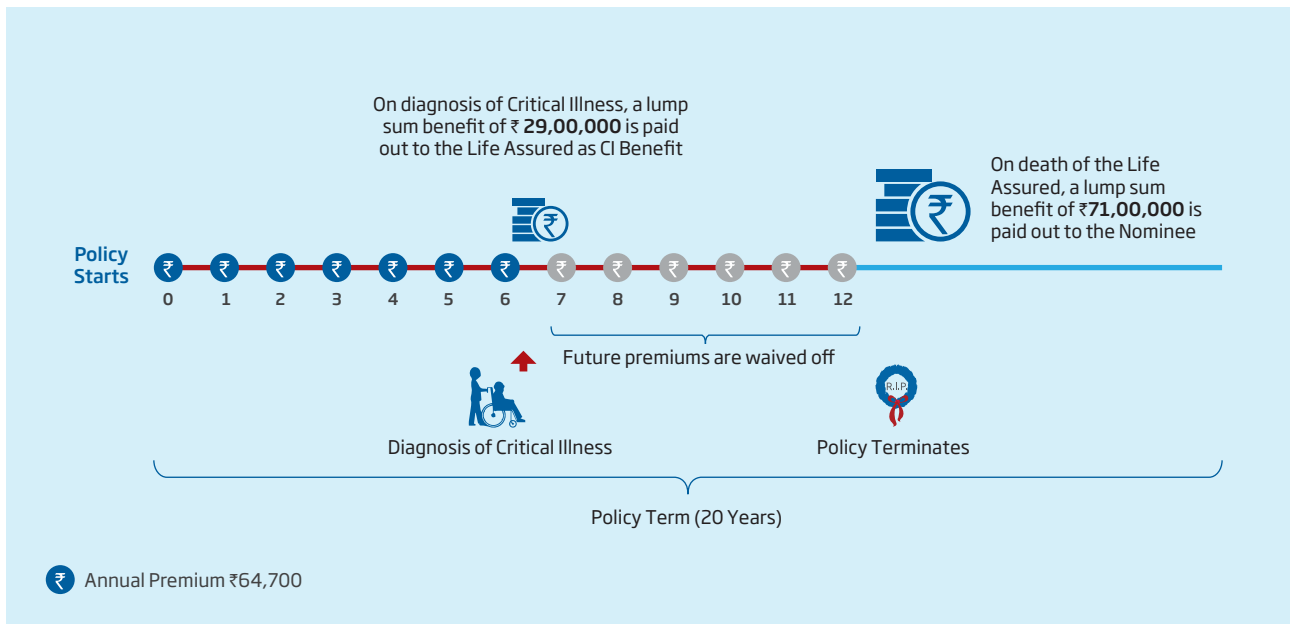

Once a Critical Illness claim is made, the Life Cover SA will be fixed at the then applicable level and the same SA will continue until the end of policy term.

Example: Mr. Xavier, a 45 years old gentleman, buys the Life & CI Rebalance option of HDFC Life Click 2 Protect Life for a policy term of 20 years, regular pay, and avails a basic sum assured of ₹1,00,00,000. He pays a premium of ₹64,700 annually.

This plan has a grace period of 30 days for yearly, half yearly and quarterly frequencies from the premium due date. The grace period for monthly frequency is 15 days from the premium due date.

Should a valid claim arise under the policy during the grace period, but before the payment of due premium, we shall still honor the claim. In such cases, the due and unpaid premium for the policy year will be deducted from any benefit payable.

Upon premium discontinuance, if Unexpired Risk Premium Value is not acquired then the policy lapses without any value.

If a policy has acquired Unexpired Risk Premium Value, all benefits such as death, maturity and survival benefits, whether ROP benefit has been selected or not, will be reduced as follows:

$$\text{Paid-up benefit} = \text{In-force benefit} \times \frac{\text{Total Premiums Paid}}{\text{Total Premiums Payable}}$$

Surrender

Unexpired Risk Premium Value (Surrender Value) gets acquired immediately upon payment of premium in case of SP and upon payment of premiums for 2 years in case of LP or RP. Unexpired Risk Premium Value will be calculated as follows:

For Income Plus Option or Return of Premium Option:

Unexpired Risk Premium Value will be the higher of Guaranteed Surrender Value (GSV) and Special Surrender Value (SSV), payable subject to the policy acquiring Unexpired Risk Premium Value.

Where,

$$\text{GSV} = \text{GSV Factor\%} \times \text{Total Premiums Paid} - \text{Survival Benefits or ROP instalment Already Paid}$$

The GSV will be floored to 0.

Where Income Plus Option has been selected:

$$\text{SSV} = ((\text{SSV F1 Factor\%} \times \text{Basic Sum Assured}) + (\text{SSV F2 Factor\%} \times \text{Sum Assured on Maturity})) \times \frac{\text{Total Premiums Paid}}{\text{Total Premiums Payable}}$$

And where ROP option has been selected:

SSV = SSVF2 Factor% x Total Premiums Paid

For details on GSV and SSV factors, please consult your financial advisor.

For Life Protect Option (Whole Life):

50% x Total Premiums Paid x $\frac{\text{Max (100- age at Surrender, 0)}}{100- \text{age at Entry}}$

Other than Income Plus Option, Life Protect Option (Whole Life) and Return of Premium Option:

Unexpired Risk Premium Value for LP/SP¹ =

50% x Total Premiums Paid x $\frac{\text{Unexpired Policy Term}}{\text{Original Policy Term}}$

Surrender Value for RP = Nil

1. If you have exercised the option to change premium payment term, Total Premiums Paid will include only premiums paid from the date of converting to Limited Pay and Original Policy Term will be the outstanding policy term on the date of converting to Limited Pay.

Please note:

- i. For the purpose of calculation of Unexpired Policy Term, only full calendar months shall be considered.
