How the plan works

Let's understand with the help of sample illustrations which are intended to show premium payable and benefits under each option, at two assumed rates of interest i.e., 8% and 4% p.a.

Please note: Some benefits in these sample illustrations shown below are guaranteed and some benefits are variable with return based on the future performance of your insurer carrying on life insurance business. If your policy offers guaranteed benefits then these will be clearly marked "guaranteed" in the illustration table on this page. If your policy offers variable benefits then the illustrations on this page will show two different rates of assumed future investment returns, of 8% p.a. and 4% p.a.

These assumed rates of return are not guaranteed and they are not the upper or lower limit of what you might get back, as the value of your policy is dependent on a number of factors including future investment performance.

Terms and Conditions:

- A. Grace Period** Grace Period means the time granted by the insurer from the due date for the payment of premium, without any penalty or late fee, during which time the policy is considered to be in force with the risk cover without any interruption, as per the terms & conditions of the policy. The grace period for payment of the premium for all types of non-linked insurance policies shall be: fifteen days, where the policyholder pays the premium on a monthly basis; and 30 days in all other cases.
- B. Lapsation:** A single premium policy doesn't lapse. For Limited Premium Payment Term (5 years), if at least 2 full years' premium is not being paid, the policy will lapse on the date of expiry of grace period. Once the policy lapses, all benefits under the policy will cease until the policy is revived for full benefits.
- C. Reduced Paid up:** For Limited Premium Payment Term (5 years), if at least 2 full years' premium has been paid and further premiums are unpaid and the policy is not surrendered, the policy will acquire the status of reduced paid up on the date of expiry of grace period up till the policy is revived for full benefits. Once the policy attains the status of reduced paid up, the death benefit will be reduced as per the formula mentioned below:

$$\text{Reduced Paid - Up Death benefit} = \frac{t}{n} \times \left\{ \begin{array}{l} \text{(Sum Assured on Death +} \\ \text{Applicable Guaranteed Terminal Additions} \\ \text{on the date of death)} \end{array} \right\} + \begin{array}{l} \text{Vested Simple Reversionary Bonus,} \\ \text{if declared, before} \\ \text{Policy acquiring reduced paid-up status} \end{array}$$

Guaranteed Terminal Additions are applicable only if death occurs after completion of 5th Policy Year.

Reduced paid-up maturity benefit will be calculated as per the formula mentioned below:

$$\text{Reduced Paid - Up Death benefit} = \frac{t}{n} \times \left\{ \begin{array}{l} \text{Sum Assured on Maturity +} \\ \text{Applicable Guaranteed Terminal Additions} \\ \text{on the date of death} \end{array} \right\} + \begin{array}{l} \text{Vested Simple Reversionary Bonus,} \\ \text{if declared, before} \\ \text{Policy acquiring reduced paid-up status} \end{array}$$

t = Number of installments of premiums paid

n = Total number of installments of premiums payable under the Policy

Once the policy is paid up it will cease to participate in the profits of participating fund until the policy is revived for full benefits. The policy terminates after payment of reduced paid up benefit.

- D. Revival:** Policy can be revived during the policy term but within a period of five years from the date of first unpaid premium. On revival, all the benefits under the policy will be restored.

For revival, you will have to submit the proof of continued insurability to the satisfaction of the board approved underwriting policy and making the payment of all due premiums together with payment of late fees calculated at such interest rate as may be prevailing at the time of the payment. If needed the company may refer it to its medical examiner in deciding on revival of lapsed policy.

The interest rate is set as per the formula below and is subject to IRDAI's approval:

Bank rate fixed by RBI as on 1st April of respective year + 2.5% rounded up to a multiple of 50 basis points. The revival interest rate for financial year 2019-20 is 9.5%.

Any change to the basis of determination of interest rate for revival is subject to prior approval of IRDAI

Guaranteed Surrender Value (GSV): For single Premium Policies, the Policy acquires Guaranteed Surrender Value at Policy inception. For Limited Premium Payment Term (5 years), if at least two full years' premiums have been paid, the policy acquires a GSV. GSV depends on the year of Surrender. GSV is the sum of the following:

1. GSV Factor 1 multiplied by the total premiums paid excluding the rider premium and premium for extra mortality rating, if any.
