B. Automatic Asset Rebalancing Strategy

We understand that your investment objectives and your risk appetite might change over time. Thus, this strategy reduces your equity proportion as your policy nears maturity to ensure that any downside in equity market later in the policy term has minimal impact on your maturity amount. This strategy rebalances the equity and debt ratio without your manual intervention of switching the funds.

Under this strategy, you can choose to allocate your money in a pre-decided ratio between our equity oriented fund (Individual Prime Equity Fund) and our debt oriented fund (Individual Preserver Fund). This allocation strategy will rebalance your funds in a pre-decided ratio between Individual Prime Equity Fund and Individual Preserver Fund at the beginning of every policy year, which depends upon the number of years to the maturity of policy. The pre-decided ratio (as % of fund value) will be as given below:

| No. of years to maturity | Individual Prime Equity Fund | Individual Preserver Fund |
|--------------------------|------------------------------|---------------------------|
| 20 | 90 | 10 |
| 15 - 19 | 80 | 20 |
| 10 - 14 | 60 | 40 |
| 5 - 9 | 40 | 60 |
| 0 - 4 | 20 | 80 |

You can choose this option either at the inception or any time during the term of the policy. You can choose to enter and exit this fund strategy with immediate effect at any time during the policy term by giving a notice in writing to the Company.

C. Systematic Transfer Plan

Systematic Transfer Plan works on the principle of rupee cost averaging method to safeguard your wealth against market volatilities. If Opted "Systematic Transfer Plan" option, the Annual Premium received net of Premium Allocation Charge shall be allocated first to the Individual Preserver Fund to purchase Units. Immediately thereafter and on each subsequent monthly anniversary, Fund Value of $[1/(13\text{-month number in the policy year})]$ of the Units available at the beginning of the month shall be Switched to Individual Prime Equity Fund automatically by cancelling Units from the Individual Preserver Fund till availability of Units in the Individual Preserver Fund.

The proportion of units will be switched from Individual Preserver Fund to the Individual Prime Equity Fund in a particular year, in the following way:

Policy Month 1: $1/(13-1) = 1/12$ th of the Units to be switched

Policy Month 2: $1/(13-2) = 1/11$ th of the Units to be switched

Policy Month 11: $1/(13-11) = 1/2$ of the Units to be switched

Policy Month 12: $1/(13-12) =$ Balance Units to be switched

Systematic Transfer Plan is available only in policies with Annual Premium payment mode and is primarily for policyholders' who wish to invest 100% in equities in a systematic manner.
