We have appointed licensed Financial Consultants, duly licensed by IRDAI, who will explain our plans to you and advise you on the correct insurance solution that will meet your needs.

A) Risk Factors:

- All unit linked life insurance plans are different from traditional insurance plans and are subject to different risk factors.
- HDFC Life Insurance Company Limited is the name of our Insurance Company and HDFC Life Pension Super Plus is the name of this plan. The name of our company and the name of our plan do not, in any way, indicate the quality of the plan, its future prospects or returns.
- The premiums paid are subject to investment risks associated with capital markets and the NAVs of the units may go up or down based on the performance of funds and factors influencing the capital market and the insured is responsible for his/her decisions
- The various funds offered under this contract are the names of the funds and do not in any way indicate the quality of these plans, their future prospects and returns.
- Please know the associated risks and the applicable charges, from your Insurance agent or the Intermediary or policy document issued by insurance company.
- Past performance of the Fund Options is not indicative of future performance.

B) Unit Prices:

We will set the Unit Price of a fund as per the IRDAI's guidelines. The unit price of Unit Linked Funds shall be computed as: Market Value of Investments held for the fund plus the value of any current assets plus any accrued income net of fund management charges less the value of any current liabilities less provision, if any. This gives the net asset value of the fund. Dividing by the number of units existing at the valuation date before any units are allocated/ redeemed, gives the unit price of the fund under consideration. We round the resulting price to the nearest Re. 0.0001. This price will be published on our website and in leading national newspapers regularly. Units shall only be allocated on the day the proposal is accepted and results into a policy by adjustment of application money towards premium. The premium will be adjusted on the due date even if it has been received in advance and the status of the premium received in advance shall be communicated to the policyholder.

C) Non-negative claw-back additions:

Upon the exit of a policy at any time on or after the completion of five policy years, we will calculate the gross yield, the net yield and the reduction in yield based on actual returns. If the reduction in yield is greater than as required under the regulations, we will add Claw-back Additions to the fund before payment of benefits to ensure compliance with the reduction in yield as per Regulation 37(d) of IRDAI (Linked Insurance Products) Regulations, 2013. Exit would mean death or surrender or maturity (vesting), whichever is earliest.

D) Special rules for large transactions:

For a very large transaction above a threshold level, in order to maintain equity and fairness with all unit holders, we may choose to apply special treatment for all transactions, which involve purchase or sale of underlying assets. The number of units allocated may reflect the expenditure incurred in the actual market transactions which occurred. The value of units obtained from encashment may be the actual value obtained as a consequence of the actual market transaction which occurred. Transactions may occur over a number of days. The threshold level will vary from time to time, depending on, amongst other matters, the liquidity of the stock markets. Our current threshold for large transactions will be Rs. 50,000,000 for a fund predominately investing in Government Securities and Rs. 25,000,000 for a fund investing in highly liquid equities.
